

**The 5th International Conference on
CRACK PATHS (CP 2015)**

Ferrara (Italy), 16 – 18 September, 2015

LIST OF ORAL PRESENTATIONS

PLENARY LECTURES

Models of initiation fatigue crack paths proposed by Macha

001 Zbigniew Marciniak, Dariusz Rozumek

Local approaches for the fracture assessment of notched components:
the research work developed by Professor Paolo Lazzarin

002 Filippo Berto

Crack paths in smooth and precracked specimens subjected to multiaxial
cyclic stressing

003 Nicholas R. Gates, Ali Fatemi

Fracture morphology and its evolution - A review on crack path stability
and brittle fracture along butt-weld

004 Yoichi Sumi

PAPERS

Investigation of Mode I fracture toughness of red Verona marble after thermal treatment

006 Daniela Scorza, Andrea Carpinteri, Giovanni Fortese, Sabrina Vantadori,
Daniele Ferretti, Roberto Brighenti

Life estimation by varying the critical plane orientation in the modified
Carpinteri-Spagnoli criterion

007 Camilla Ronchei, Andrea Carpinteri, Giovanni Fortese, Marta Kurek,
Tadeusz Łagoda, Andrea Spagnoli, Sabrina Vantadori

A unified approach for static and dynamic fracture failure in solids and
granular materials by a particle method

009 Roberto Brighenti, Andrea Carpinteri, Nicholas Corbari

Delamination cracking effects on fracture toughness behavior of 14YWT
nanostructured ferritic alloys (NFA)

010 Claudio Ruggieri, G. Robert Odette

A probabilistic approach to cleavage fracture including constraint and plastic strain
effects with application to predict the influence of specimen geometry on elastic-plastic
fracture toughness

011 Claudio Ruggieri, Robert H. Dodds

Static and dynamic experimental study of strengthened reinforced short concrete corbel by using carbon fabrics, crack path in shear zone

012 Ivelina Ivanova, Jules Assih

Influence of local stress concentrations on the crack propagation in complex welded components

013 Claas Fischer, Wolfgang Fricke

A link between the peak stresses and the averaged strain energy density for cracks under mixed-mode (I+II) loading

014 Giovanni Meneghetti, Alberto Campagnolo, Filippo Berto, Bruno Atzori

Estimation of stepwise crack propagation in ceramic laminates with strong interfaces

015 L. Náhlík, K. Štegnarová, P. Hutař

Critical crack path assessments in failure investigations

016 Robert D. Caligiuri

Measurement and simulation of crack growth rate and direction under non-proportional loadings

017 Y. Hos, M. Vormwald

Effects of microstructure and crystallography on crack path and intrinsic resistance to shear-mode fatigue crack growth

019 J. Pokluda, T. Vojtek, A. Hohenwarter, R. Pippan

Crack paths and the linear elastic analysis of cracked bodies

020 Les P. Pook

Effect of segregations on mechanical properties and crack propagation in spring steel

021 B. Žužek, M. Sedlaček, B. Podgornik

Crack initiation at V-notch tip subjected to in-plane mixed mode loading:

An application of the fictitious notch rounding concept

022 F. Berto

High temperature fatigue tests and cracks growth in 40CrMoV13.9 notched components

023 P. Gallo, F. Berto

Three-dimensional effects on cracked discs and plates under nominal Mode III loading

024 A. Campagnolo, F. Berto, L.P. Pook

Crack path for run-out specimens in fatigue tests: is it belonging to high- or very-high-cycle fatigue regime?

025 Andrey Shanyavskiy

Crack path predictions and experiments in plane structures considering anisotropic properties and material interfaces

026 P.O. Judt, A. Ricoeur

Analytical model of asymmetrical Mixed-Mode Bending test of adhesively bonded GFRP joint

028 M. Ševčík, A.P. Vassilopoulos, M. Shahverdi, P. Hutař

Applications of lattice method in the simulation of crack path in heterogeneous materials

029 L.E. Kostas, F.S. Soares, I. Iturrioz

Modelling 3D crack propagation in ageing graphite bricks of Advanced Gas-cooled Reactor power plant

030 T.-T.-G. Vo, P. Martinuzzi, V.-X. Tran, N. McLachlan, A. Steer

In-situ observation of rolling contact fatigue cracks by laminography using ultrabright synchrotron radiation

031 Y. Nakai, D. Shiozawa, S. Kikuchi, K. Sato, T. Obama, T. Makino, Y. Neishi

The concept of the average stress in the fracture process zone for the search of the crack path

034 Yu.G. Matvienko, M.M. Semenova

Evaluation of near-threshold fatigue crack propagation in Ti-6Al-4V alloy with harmonic structure created by mechanical milling and spark plasma sintering

035 S. Kikuchi, T. Imai, H. Kubozono, Y. Nakai, A. Ueno, K. Ameyama

Influence of vacuum carburizing treatment on fatigue crack growth characteristic in DSG2

037 K. Nambu, N. Egami

Crack propagation in fracture mechanical graded structures

038 B. Schramm, H.A. Richard

Unguided crack path prediction by using peridynamics

039 Erdogan Madenci, K. Colavito, Nam Phan

Kinetics of fatigue crack growth and crack paths in the old puddled steel after 100-years operating time

040 G. Lesiuk, M. Szata

Experimental analysis of crack evolution in concrete by the acoustic emission technique

041 J. Saliba, A. Loukili, J.P. Regoin, D. Gregoire, L. Verdon, G. Pijaudier-Cabot

Identification of crack paths and loading parameters in plate structures by solving inverse elastic boundary value problems

042 Ramdane Boukellif, Andreas Ricoeur

Fatigue crack propagation in short-fiber reinforced plastics

043 Keisuke Tanaka, Kazuya Ohrada, Daiki Yamada, Kenichi Shimizu

Crack growth simulation in heterogeneous material by S-FEM and comparison with experiments

044 Masanori Kikuchi, Yoshitaka Wada, Yulong Li

Effect of inhomogeneous distribution of non-metallic inclusions on crack path deflection in G42CrMo4 steel at different loading rates

045 S. Henschel, L. Krüger

Effects of large amounts of hydrogen on the fatigue crack growth behavior of torsional prestrained carbon steel

046 Yuta Matsuda, Hiroshi Nishiguchi, Takayuki Fukuda

Effect of defect length on rolling contact fatigue crack propagation in high strength steel
047 Taizo Makino, Yutaka Neishi, Daiki Shiozawa, Shoichi Kikuchi, Souta Okada, Kentaro Kajiwara, Yoshikazu Nakai

Graphene as a model system for 2D fracture behavior of perfect and defective solids
049 Peter Hess

Chemistry of grain boundary segregation and embrittlement: recent advances and open problems (only Extended Abstract)
050 Pavel Lejček, Mojmír Šob

Fatigue crack paths and properties in A356-T6 aluminum alloy microstructurally modified by friction stir processing under different conditions
052 A. Tajiri, Y. Uematsu, T. Kakiuchi, Y. Suzuki

EBSD-assisted fractographic analysis of crack paths in magnesium alloy
053 S. Takaya, Y. Uematsu, T. Kakiuchi, M. Nakajima

Understanding the edge crack phenomenon in ceramic laminates
054 Oldřich Ševeček, Michal Kotoul, Dominique Leguillon, Eric Martin, Raul Bermejo

Investigation of crack paths in natural fibre-reinforced composites
055 S. Keck, M. Fulland

Lubricating fluid pressurization and entrapment in inclined edge cracks under rolling-sliding contact fatigue
056 M. Benedetti, S. Ancellotti, M. Dallago, V. Fontanari, M. Beghini

Influence of control parameters on the crack paths in the aluminum alloy 2024 under bending
058 Ewa Marcisz, Dariusz Rozumek, Zbigniew Marciniak

On the crack path under mixed mode loading on PUR foams
059 Liviu Marsavina, Emanoil Linul, Tudor Voiconi, Dan M. Constantinescu, Dragos A. Apostol

Improvement of adhesion performance of mortar-repair interface with inducing crack path into repair
060 A. Satoh, M. Satoh, K. Yamada

Degenerated graphite nodules influence on fatigue crack paths in a ferritic ductile cast iron
062 Francesco Iacoviello, Vittorio Di Cocco

Fatigue crack micromechanisms in a Cu-Zn-Al shape memory alloy with pseudo-elastic behavior
063 Vittorio Di Cocco, Francesco Iacoviello, Stefano Natali, Andrea Brotzu

Multiscale study of fracture in aluminum-magnesium alloy under fatigue and dynamic loading
064 Vladimir Oborin, Mikhail Bannikov, Oleg Naimark, Mikhail Sokovikov, Dmitry Bilalov

Growth behavior of fatigue cracks in ultrafine grained Cu smooth specimens with a small hole
066 Masahiro Goto, Kakeru Morita, Junichi Kitamura, Takaie Yamamoto, Masataka Baba, Seung-zeon Han, Sangshik Kim

Fatigue crack growth in additive manufactured products

067 Andre Riemer, Hans Albert Richard, Jan-Peter Brüggemann, Jan-Niklas Wesendahl

Crack detection and safety evaluation of railway bogie frame after long term running

068 Seok-Jin Kwon, Jung-Won Seo, Dong-Hyung Lee, Hyun-Kyu Jun

Effect of centrifugal load on crack path in thin-rimmed and webbed gears

069 Francesca Curà, Andrea Mura, Carlo Rosso

Combined lock-in thermography and heat flow measurements for analysing heat dissipation during fatigue crack propagation

071 J. Bär, A. Vshivkov, O. Plekhov

Crack growth behavior of aluminum alloy 6061 T651 under uniaxial and biaxial planar testing condition

072 Sebastian Henkel, Esther Liebelt, Horst Biermann, Stephanie Ackermann, Lutz Zybell

Modelling of ultrasonic impact treatment (UIT) of welded joints and its effect on fatigue strength

074 Kui Lin Yuan, Yoichi Sumi

Crack mode and life of Ti-6Al-4V under multiaxial low cycle fatigue

077 Takamoto Itoh, Takahiro Morishita, Masao Sakane, Hiroshi Nakamura, Masahiro Takanashi

Relation between the plastic instability and fracture of tensile tested Cu-Sn alloys investigated with the application of acoustic emission technique

078 Wojciech Ozgowicz, Barbara Grzegorzczuk, Andrzej Pawełek, Wojciech Wajda, Wojciech Skuza, Andrzej Piątkowski, Zbigniew Ranachowski

Mechanisms of plastic instability and fracture of compressed and tensile tested Mg-Li alloys investigated using the acoustic emission method

079 Andrzej Pawełek, Andrzej Piątkowski, Wojciech Wajda, Wojciech Skuza, Anna Tarasek, Wojciech Ozgowicz, Barbara Grzegorzczuk, Zbigniew Ranachowski, Stanislav Kúdela, Jr., Stanislav Kúdela

Crack initiation and propagation on the polymeric material ABS (Acrylonitrile Butadiene Styrene), under ultrasonic fatigue testing

081 G.M. Domínguez Almaraz, E. Correa Gómez, J.C. Verduzco Juárez, J.L. Ávila Ambriz

Effect of rare earth content on fatigue strength of spheroidal graphite cast iron

082 Kaito Todate, Kazumichi Shimizu, Takafumi Funabiki, Kenta Kusumoto, Shinsuke Nagaumi

Numerical analysis of various equivalences of an individual surface crack with periodically distributed surface cracks

083 Byunghyun Kang, Byoung-Ho Choi

Fatigue crack growth behavior of Inconel 718 produced by selective laser melting

084 R. Konečná, L. Kunz, G. Nicoletto, A. Bača

Fatigue crack growth under remote and local compression – A state-of-the-art review

085 Amir Chahardehi, Ali Mehmanparast

Analysis of cracking of low-alloy copper stretched at elevated temperature

086 Elżbieta Kalinowska-Ozgowicz, Wojciech Ozgowicz, Klaudiusz Lenik, Aneta Duda

Fatigue cracking of aluminium alloy AlZn6Mg0,8Zr subjected to thermomechanical treatment

089 A. Kowalski, W. Ozgowicz, M. Kurek, A. Kurek, T. Łagoda

A cohesive zone model to simulate the hydrogen embrittlement effect on a high-strength steel

091 Giorgia Gobbi, Chiara Colombo, Laura Vergani

Fatigue life prediction of pedicle screw for spinal surgery

092 Š. Major, V. Kocour

EBSD investigation of fatigue crack propagation past a crack closure due to overload

093 Enrico Salvati, Samuel O'Connor, David Nowell, Alexander M. Korsunsky

Experimental investigation of crack initiation and propagation in high- and gigacycle fatigue in titanium alloys by study of morphology of fracture

094 Mikhail Bannikov, Oleg Naimark, Vladimir Oborin

Fatigue crack growth prediction in 2xxx AA friction stir weld HAZ properties

095 A. Tzamtzis, A.T. Kermanidis

Experimental study of heat dissipation at the crack tip during fatigue crack propagation

096 A. Vshivkov, A. Iziumova, O. Plekhov, J. Bär

Numerical study of crack path by MMCG specimen using M integral

098 S. El Kabir, R. Moutou Pitti, N. Recho, Y. Lapusta, F. Dubois

Fatigue crack paths in a low-carbon steel. Modelling of fatigue behaviour

099 Donka Angelova, Rozina Yordanova, Svetla Yankova

A numerical study of crack paths using finite element granular mesh structures

101 Anais Jacob, Ali Mehmanparast, Athanasios Kolios (only Extended Abstract)

Crack initiation and fracture features of Fe–Co–B–Si–Nb bulk metallic glass during compression

102 S. Lesz, A. Januszka, S. Griner, R. Nowosielski

Crack path & fracture surface modifications in cement composites

103 S. Ahmad, J.M. Tulliani, G.A. Ferro, R.A. Khushnood, L. Restuccia, P. Jagdale

Development of in-situ fatigue crack observing system for rotating bending fatigue testing machine

104 B. Lian, A. Ueno, T. Iwashita

Fatigue failure analysis of pin-loaded lugs

105 Slobodanka Boljanović, Stevan Maksimović

Modelling of the fracture toughness anisotropy in fiber reinforced concrete

106 S. Tarasovs, J. Krumiņš, V. Tamužs

Influence of operation factors on brittle fracture initiation and critical local cleavage stress in VVER pressure vessel steel specimens of SE(B) type (only Extended Abstract)

107 E.A. Kuleshova, B.A. Gurovich, A.D. Erak, D.A. Maltsev, D.A. Zhurko, A.P. Bandura, S.A. Bubyakin

Influence of initial residual stresses on crack path prediction with the eXtended Finite Element Method (only Extended Abstract)

110 Olivier Pierard, Benoît Dompierre, Eric Wyart

Fretting fatigue crack propagation rate under variable loading conditions

111 C. Gandiolle, S. Fouvry

Very high cycle fatigue strength and crack growth of thin steel sheets

113 Mohand Ouarabi, Ruben Perez Mora, Thierry Palin-Luc, Claude Bathias

Paths of interactive cracks in creep conditions

114 Krzysztof Nowak

Mechanism of crack branching in the fatigue crack growth path of 2324-T39 aluminium alloy

115 Songsong Lu, Rui Bao, Ting Zhang, Binjun Fei

Microstructure dependence of fatigue crack propagation behavior in wrought magnesium alloy

117 Shigeki Morita, Seiya Fujiwara, Takahito Hori, Nobusuke Hattori, Hidetoshi Somekawa, Tsuyoshi Mayama

Crack initiation characteristics and fatigue property of a high-strength steel in VHCF regime under different stress ratios

118 Xiaolong Liu, Chengqi Sun, Youshi Hong

Crack initiation and early propagation plane orientation of 2A12-T4 aluminum alloy under tension-torsion fatigue loading including mean tensile stress

119 Xinhong Shi, Jianyu Zhang, Qingshan Xiao, Tianqi Liu

Sub-critical cohesive crack propagation with hydro-mechanical coupling and friction

120 S. Valente, A. Alberto, F. Barpi

A non-linear procedure for the numerical analysis of crack development in beams failing in shear

122 Patrizia Bernardi, Roberto Cerioni, Elena Michelini, Alice Sirico

Prediction of three-dimensional crack propagation paths taking high cycle fatigue into account

124 Guido Dhondt

Surface crack growth subject to bending and biaxial tension-compression

125 V. Shlyannikov, A. Tumanov, A. Zakharov, A. Gerasimenko

Modified fracture properties of cement composites with nano/micro carbonized bagasse fibers

126 R.A. Khushnood, S. Ahmad, G.A. Ferro, L. Restuccia, J.M. Tulliani, P. Jagdale

Welding sequence effects on residual stress distribution in offshore wind monopile structures

127 Ali Mehmanparast, Oyewole Adedipe, Amir Chahardehi, Feargal Brennan

Crack growth threshold under hold time conditions in DA Inconel 718 - A transition in the crack growth mechanism

128 E. Fessler, S. Pierret, E. Andrieu, V. Bonnard

- Crack path in liquid metal embrittlement : experiments with steels and modeling
129 Thierry Auger, Samuel Hémerly, M. Bourcier, Clotilde Berdin, May Martin, Ian Robertson
- The influence of an axial pre-stress on the fatigue limit (only Extended Abstract)
130 Vinko Močilnik, Nenad Gubeljak, Jožef Predan
- The study of a defect evolution in iron under fatigue loading in gigacyclic fatigue regime
131 O. Plekhov, O. Naimark, M. Narykova, A. Kadomtsev, V. Betehtin
- Controlling fatigue crack paths for crack surface marking and growth investigations
132 S. Barter, M. Burchill, P. White
- Evolution of fracture mode for varying grain sizes in a hydrogen-charged metastable austenitic steel (only Extended Abstract)
133 Arnaud Macadre, Nobuo Nakada, Toshihiro Tsuchiyama, Setsuo Takaki
- Fatigue properties and fracture mechanism of load carrying type fillet joints with one-sided welding
136 Takamasa Abe, Hiroyuki Akebono, Masahiko Kato, Atsushi Sugeta
- Implementation of a damage model in a finite element program for computation of structures under dynamic loading
138 Nasserline Oudni, Youcef Bouafia
- Fatigue crack growth and arrest under high cycle thermal loading using XFEM in presence of weld residual stresses
139 Said Taheri, Emricka Julan, Van-Xuan Tran
- Influence of joint line remnant on crack paths under static and fatigue loadings in friction stir welded Al-Mg-Sc alloy
142 Yasuko Besel, Michael Besel, Ulises Alfaro Mercado, Toshifumi Kakiuchi, Yoshihiko Uematsu
- Damage and failure modeling of lotus-type porous material subjected to low-cycle fatigue
143 J. Kramberger, K. Sterkuš, S. Glodež
- Fatigue crack initiation and propagation in lotus-type porous material
144 S. Glodež, S. Dervarič, M. Šraml, J. Kramberger
- Plasma-sprayed thermal barrier coatings: numerical study on damage localization and evolution
145 K. Slámečka, P. Skalka, L. Čelko, J. Pokluda, L. Saucedo-Mora, T.J. Marrow, U. Thandavamoorthy
- Crack path in aeronautical titanium alloy under ultrasonic torsion loading
147 A.D. Nikitin, T. Palin-Luc, A.A. Shanyavskiy, C. Bathias
- DBEM crack propagation for nonlinear fracture problems
150 R. Citarella, V. Giannella, P. Di Lascio, M. Lepore
- Orientation of propagating crack paths emanating from fretting-fatigue contact problems
155 Eugenio Giner, Josè Diaz-Alvarez, Miguel Marco

New experimental techniques for fracture testing of highly deformable materials
156 E. Dall'Asta, V. Ghizzardi, R. Brighenti, E. Romeo, R. Roncella, A. Spagnoli

Experimental estimation of the heat energy dissipated in a volume surrounding the tip
of a fatigue crack
157 G. Meneghetti, M. Ricotta

A numerical study of two different specimen fixtures for the modified compact tension
test – their influence on concrete fracture parameters
159 Táňa Holušová, Stanislav Seitl, Hector Cifuentes, Alfonso Fernández-Canteli

Effect of additive elements and aging on crack initiation and propagation behavior for
Sn-Bi solders
160 Noritake Hiyoshi, Mitsuo Yamashita, Yasuaki Watanabe

Investigation of mixed mode-I/II fracture problems - Part 1 : Computational and
experimental analyses
161 O. Demir, S. İriç, A.O. Ayhan, H. Lekesiz

Investigation of mixed mode-I/II fracture problems - Part 2 : Evaluation and
development of mixed mode-I/II fracture criteria
162 O. Demir, A.O. Ayhan

Finite element modeling and experimental studies on mixed mode-I/III fracture
specimens
163 M. Bozkurt, A.O. Ayhan, M.F. Yaren, S. İriç

Multiple and non-planar crack propagation analyses in thin structures using FCPAS
164 H. Dündar, A.O. Ayhan

Evolution of crack aspect ratio in sheets subjected to fatigue
165 J. Toribio, J.C. Matos, B. González

Crack initiation and propagation paths in FSW tubes under fatigue loading
167 Roberto Tovo, Luca Susmel, Neil James, Danie Hattingh, Enrico Maggiolini

Multiaxial fatigue crack path prediction using critical plane concept
168 Jafar Albinmoussa

Fatigue characterization of a crankshaft steel: Use and interaction of new models
169 Sergio Blasón, Cristina Rodríguez, Alfonso Fernández-Canteli
